

Decent People, Decent Company

In the News

Bob and Lyn Turknett's book, *Decent People, Decent Company*, was recently made the subject of a book review by Executive Book Summaries (<http://www.summary.com>). The review details the importance of the Turknett's Leadership Character Model, and how it relates the integrity, respect, and responsibility of both corporations and the individuals it employs. The review cites the actual case studies which were present in the book, in order to portray how the Turknett's model has worked in the actual business world.

"By providing readers with eye-opening research and expert advice, along with the stories from others who have struggled to create better working environments, the Turknetts offer effective ways for people and organizations to grow, become more effective and succeed."
